

Comfort ventilation Showrooms

KE Fibertec supplies tailored and sustainable ventilation solutions

Textile ducts are used for heating and ventilating showrooms - from retail shops to exhibition halls.

The solutions of KE Fibertec are based on advanced technical calculations ensuring that the result lives up to expectations.

A ventilation solution from KE Fibertec offers two systems in one as the textile ducts act both as air supply unit and plenum thus saving many feet of passive duct for air distribution.

Textile ducts are easily integrated into the building design.

Benefits of KE Fibertec textile ducting:

- Efficient and uniform distribution of fresh air
- No draft and no dead zones
- No condensation - no insulation required
- Lightweight textile ducts that may be fitted to any type of ceiling
- Easy to maintain
- 1600 custom colours ensure that the ducts can be tailored to any architectural design
- Silent air distribution
- Logos optional
- Wide product range offers high flexibility in choice of solution

We offer many well-documented reference projects:

The National Corvette Museum, USA

Älvsjömessan, Sweden

Dover Air Base, USA

Farnborough Exhibition, England

Dublin Zoo, Ireland

Four Rivers Harley Davidson, USA

Yorkshire Event Centre, England

Priddy's Hard Museum, England

RB Akins, USA
