

comfort ventilation auditoriums and theatres

KE Fibertec
- we supply
tailored and
sustainable ven-
tilation solutions

Textile ducts can be readily used for ventilating and cooling of auditoriums and theatres.

The solutions of KE Fibertec are based on advanced technical calculations ensuring that the ducts live up to expectations.

Further, textile ducts ensure a high level of comfort for the seated audience.

A ventilation solution from KE Fibertec meets the strict noise requirements that apply to this type of room.

We offer many well-documented reference projects:

Stockton Baptist Tabernacle, UK

Yeovil Community Church, UK

Lillehammer Hotel, Norway

UiTM, Malaysia

Roadmender Nightclub, UK

Mølleparken, Norway

Benefits of KE Fibertec ventilation ducts:

- Efficient and uniform distribution of fresh air.
- No draught and no dead zones.
- Free of condensation - no insulation required.
- Lightweight textile ducts that may be fitted to any type of ceiling.
- Easy maintenance.
- 1600 custom colours ensure that the ducts can be tailored to any architectural design.
- Silent air distribution - documented down to 25 dbA.
- Easy to integrate into the design of the building.

CHOOSE SUSTAINABLE VENTILATION

All KE Fibertec textiles are tested and approved according to the Oeko-Tex® Standard 100.

Our production is certified according to the ISO 14001 standard (Environmental Management System).

Transportation and disposal of textile duct systems produce less CO₂ pollutants than conventional steel ducts.
