

comfort ventilation showrooms

KE Fibertec
- we supply
tailored and
sustainable ven-
tilation solutions

Fabric ducts are used for heating and ventilating showrooms - from retail shops to exhibition halls.

The solutions of KE Fibertec are based on advanced technical calculations ensuring that the result lives up to expectations.

A ventilation solution from KE Fibertec offers two systems in one as the fabric ducts act both as air supply unit and plenum thus saving many feet of passive duct for air distribution.

Fabric ducts are easily integrated into the building design.

We offer many well-documented reference projects:

The National Corvette Museum, USA

Dover Air Base, USA

Stockholmsmässan, Sweden

Intech Exhibition, UK

Four Rivers Harley Davidson, USA

Dublin Zoo, Ireland

Benefits of KE Fibertec ventilation ducts:

- Efficient and uniform distribution of fresh air.
- No draft and no dead zones.
- No condensation - no insulation required.
- Lightweight fabric ducts that may be fitted to any type of ceiling.
- Easy to maintain.
- 1600 custom colors ensure that the ducts can be tailored to any architectural design.
- Silent air distribution.
- Logos optional.
- Wide product range offers high flexibility in choice of solution.

CHOOSE SUSTAINABLE VENTILATION

All KE Fibertec fabrics are tested and approved according to the Oeko-Tex® Standard 100.

Our production is certified according to the ISO 14001 standard (Environmental Management System).

Transportation and disposal of fabric duct systems produce less CO₂ pollutants than conventional steel ducts.
