

comfort ventilation schools

KE Fibertec
- we supply
tailored and
sustainable ven-
tilation solutions

KE Fibertec helps to make sure students don't lose focus by providing air distribution solutions for class rooms.

Round or halfround KE Interior® fabric ducts, flush mounted with the ceiling, distribute air with comfortable air velocities and low noise.

KE Fibertec's fabric ducts are well-suited for demand-driven ventilation (VAV systems that are adjusted according to the CO₂ content in the room).

Fabric ducts from KE Fibertec are also very well-suited for retrofit applications.

We offer many well-documented reference projects:

Drew Charter School, USA

Billy Bubbles, UK

Miller Grove High School, USA

Paul Mitchell Coll. of Cosmetology, USA

Colegio Arubano, Aruba

Universiteit te Leiden, the Netherlands

Benefits of KE Fibertec ventilation ducts:

- Efficient and uniform distribution of fresh air.
- No draft and no dead zones.
- Lightweight fabric ducts that may be fitted to any type of ceiling.
- Easy to maintain.
- 1600 custom colors ensure that the ducts can be tailored to any architectural design.
- Silent air distribution - documented down to NC-20/25.
- Clean air as the systems filter out airborne dust particles.
- Low initial costs compared with conventional solutions.

CHOOSE SUSTAINABLE VENTILATION

All KE Fibertec fabrics are tested and approved according to the Oeko-Tex® Standard 100.

Our production is certified according to the ISO 14001 standard (Environmental Management System).

Transportation and disposal of fabric duct systems produce less CO₂ pollutants than conventional steel ducts.
