

industrial ventilation light industry

KE Fibertec
- we supply
flexible and
sustainable ven-
tilation solutions

Fabric ducts solve industry's need for distributing fresh air to the employees without drafts that may lead to increased sick leave.

The solutions of KE Fibertec are based on advanced technical calculations ensuring that the result lives up to expectations. The ducts are easy to install and may be moved if the production layout should change.

KE Fibertec's fabric ducts require only a minimum of maintenance which contributes to minimizing the number of unnecessary interruptions in production.

We offer many well-documented reference projects:

Danish Emergency Man. Agency

Cimbria Construction, Denmark

Stork Aerospace, the Netherlands

Drukkerij Geostick, the Netherlands

Ecophon, Sweden

Hickey Freeman, USA

Benefits of KE Fibertec ventilation ducts:

- Efficient and uniform air distribution.
- No draft - well-suited for energy-efficient zone ventilation (displacement).
- No condensation - no insulation required.
- Lightweight fabric ducts that may be fitted to any type of ceiling.
- Wide range of products offers high flexibility in choice of solution.
- Easy to maintain - no growth of microorganisms.
- 1600 custom colors ensure that the ducts can be tailored to any architectural design.
- Well-suited for retrofitting within existing production facilities.

CHOOSE SUSTAINABLE VENTILATION

All KE Fibertec fabrics are tested and approved according to the Oeko-Tex® Standard 100.

Our production is certified according to the ISO 14001 standard (Environmental Management System).

Transportation and disposal of fabric duct systems produce less CO₂ pollutants than conventional steel ducts.
