The D-Safetrack is supplied in cut lengths to match the fabric duct and is packed with the necessary components and marked individually with exact indication of placement.

KE Fibertec suggest the D-Safetrack for KE-Interior® systems exceeding D 32” or for industrial applications where the ceiling material is unknown. The D-Safetrack is the optimum solution where KE-Interior® systems are mounted below the ceiling surface (see alternative suspensions).

Not included in the delivery: Screws for ceiling attachment.
If the KE-Interior® duct is not to be placed directly against the ceiling, one of the suspension types below may be applied:

1. **Alu-Thread Flange** for attachment to all types of ceiling.
   Supplied as standard with 39” thread bar.
   Available in stainless steel AISI 304 or AISI 316.
   Max. span between supports is 6’6”.

2. **SafeThread** with expansion bolt for attachment into concrete, or with bolt screw for attachment into wood.
   Supplied as standard with 39” thread bar.
   Available in stainless steel AISI 304 or AISI 316.
   Max. span between supports is 6’6”.

3. **SafeStrap-Up** is supplied with 39” Ø 3/4” aluminium tube and top flange.
   Recommended for applications requiring long or very stable suspension systems.
   Also available in 20”, 59” and 79” length.

4. **SafeWire Strap-Up** is supplied as standard with 39” cable with loop to be fastened to a hook in the ceiling (not included).
   Also available in 79” length.
   Max. span between supports is 6’6”.

**D-Safetrack**

**Alternative suspensions**

1. Thread flange
   Lock nut
   M6 thread bar (std. 39”)
   Lock nut
   Spacing profile
   Alu suspension section

2. Expansion bolt or bolt screw
   Connector
   M6 thread bar (std. 39”)
   Lock nut
   Spacing profile
   Alu suspension section

3. Screws
   Top flange
   SafeStrap-Up tube
   Spacing profile
   Alu suspension section
   Screws

4. Crimp/cable lock nut
   Cable (std. 39”)
   Eye bolt
   Lock nut
   Spacing profile
   Alu suspension section
