The Safetrack is supplied in cut lengths to match the fabric duct and is packed with the necessary components and marked individually with exact indication of placement.

KE Fibertec recommend single-suspended Safetrack for ducts up to Ø 35”.

Thread bars as standard are supplied in 39” lengths. Different lengths available on request.

Not included in the delivery: Screws for ceiling attachment.
1. **Safetrack** is clicked directly into the **SafeCeil** for convenience and is designed for mounting the fabric duct close to the ceiling. Max. span between supports is 6’6”.

2. **SafeThread** as standard is supplied with 39” thread bar with expansion bolt for concrete or bolt screw for wood fixing. Also available in stainless steel AISI 304 or AISI 316. Max. span between supports is 8’2”.

3. **SafeStrap-Up** as standard is supplied with 39” Ø3/4” aluminium tube and top flange. Recommended for fabric ducts of Ø > 35” or for applications requiring long suspension systems. Also available in 20”, 59” and 79” length. Max. span between supports is 8’2”.

4. **SafeWire Strap-Up** as standard is supplied with 39” cable with loop to be attached to a hook in the ceiling (not included). Also available in 79” length. Max. span between supports is 8’2”.
