

SafeTrack Arch

The superior 3:1 mounting system

| Diameter duct [mm] | Width [mm] | Weight [g] |
|--------------------|------------|------------|
| 400 | 437 | 144 |
| 450 | 483 | 158 |
| 500 | 528 | 170 |
| 560 | 582 | 186 |
| 600 | 618 | 196 |
| 630 | 646 | 203 |
| 710 | 718 | 225 |
| 800 | 800 | 248 |
| 900 | 890 | 273 |
| 1000 | 981 | 298 |
| 1100 | 1072 | 325 |
| 1200 | 1162 | 349 |
| 1250 | 1208 | 363 |

The Safetrack Arch brackets keep the Textile duct looking inflated even when the air is off and makes for an aesthetically appealing installation.

The unique Safetrack rail is constructed in a way the Arch bracket can easily be clicked on the single top rail without using any tools.

Unlike similar cable based systems the Safetrack Arch system has 100% continuous support of the duct and the rail is sturdy enough to support the weight of the Arch & duct with no sagging if installed according to KE mounting instructions.

Inflation "popping" in the Textile duct caused by the initial Air Handler start up can be reduced by using the Safetrack Arch.
